72MAY80

- 118 day maturity hybrid.
- 105-110 days maturity for silage*.
- Semi-upright leaf structure.
- Cob tip filling is very good.
- 14-16 rows around the cob.*
- Cob length is 45-47 kernels on average.*
- Excellent staygreen through harvest time with rapid grain drydown.
- High test weight.
- Best performance if planted at 5.5" between plants on 30" rows.
- Dual purpose hybrid.
- Adapted to a wide range of soil types.

SILAGE PROPERTIES

Due to high grain component the feeding value of the silage is high giving excellent milk and butterfat yields.

*The performance of the variety may vary according to the climatic conditions, cultivation practices and soil types.
