M11GS99

- 114 day hybrid.
- 88-92 days to harvest for silage. *
- High yield for maturity. *
- Excellent seed germination and seedling vigor.
- Adapted across a wide range of soil types.
- Best performance if planted at 5.5" between plants on 30" rows.
- Excellent roots and stalks to resist lodging.
- Ear size is 14-16 rows around and 40-42 kernels long. *
- Excellent staygreen.
- Rapid dry down.
- Dual purpose hybrid that is widely adapted.

SILAGE PROPERTIES

The large leaf and grain content of the silage translate to excellent feeding values with outstanding milk and butterfat yields.

*The performance of the variety may vary according to the climatic conditions, cultivation practices and soil types.
